KILL THE LOOP

Description of the company

We are an **Irish IT Solutions Provider** and we only do **Quality Work**.

OUR BUSINESS MODEL

Kill The Loop is an Intelligent & Ethical Business:

⌘ WHY Intelligent

- Kill The Loop is an intelligent business because the team is formed uniquely with Top Class developers and designers, people highly qualified, responsible and serious. They are proactive, positive, creative and perfectionist. They ensure efficiency, quality and delivery on time in all their projects.
- Kill The Loop is an intelligent business because it uses a fair business model, in accordance with level of complexity and customization of the projects, supply and demand of the products in the market and adapting themselves to the economy of the country for which they are developing their projects.
- Kill The Loop is an intelligent business because it has a special interest for Scientific and Innovative projects, but they also adapt themselves to any kind of project, requirements and particular taste of each client.

⌘ WHY Ethical

- Kill The Loop is an ethical business because it treats employees and customers with respect, good manners, professionalism and in a friendly way. It is a legal and honest business. They encourage fellowship, generosity and good humor in the work environment.
- Kill The Loop is an ethical business because it rewards and gives value to each worker for the efforts and good results they give.
- Kill The Loop is an ethical business because it pays good wages to their workers, and to all those who have made the delivery on time and with a perfect quality they are rewarded with a percentage of the final benefit obtained or are given an extra payment.

Please read our services, rates and estimations in the following pages.

- Contact us for any stage of your project life cycle:

Project Planning | Project Management | UX/UI Design | Development | Blackbox testing, Code testing and Bug fixing | App Submission Assistance | Maintenance

What we offer

- Accurate time estimations.
- Fair prices.
- Honest advice for UX, UI, app marketing strategies, etc...
- Files and deliverables for testing during execution until complete client satisfaction is achieved.
- Delivery of source code and copyright after payment.
- On-time delivery.
- Excellent customer service.
- Experienced project management.
- An expert developer or app development team as well as a creative designer or app design team.
- App designs with retina display quality, pixel perfect for Apple devices.
- Excellent development, testing, and debugging.
- Superior source code standards that implement the most efficient methods for all programming tasks (better, shorter, and faster).
- Efficient memory management, which prevents apps from crashing unexpectedly and frequently.
- Quicker app response, which means less time spent loading screens, showing and saving information, generating maps, etc...
- Apps with less size, allowing them to be downloaded quickly from the App Store and require less space for installation.
- Free 2 months of bug fixing after app submission.

What we expect from you

- A good document specification so we can make an accurate estimation. Sketches or designs required (service that we also offer if you need help).
- A contract agreement.
- Payment on time and before App Store submission or deployment to your server (or we could work directly on your servers getting payment in advanced).

KILL THE LOOP

3. Special Package

Lately we are receiving many requests from World Leader and Fortune 500 companies, SMEs and startups in Ireland that would like Kill The Loop team take part in their projects development. We, as a Service Provider, always do the work remotely from our offices or homes, but in these special cases the clients can't share their source code with us because of many reasons (confidentiality agreements, privacy, security, need to be in touch every day with the team members, etc), so they want we lend them some of our developers during their project duration (usually 6 months), so we have finally decided to provide [Hiring & Staffing services](#) as well.

Top Companies believe Freelance people have special qualities that differentiate them from the rest. Top Developers always have a freelancer mentality. And we only work with talented freelance people, that's why they contact us.

3.1. Experts

One of our Senior Software Developers will work at your office every day for the period you require.

3.2. Talented Graduated & Students

We are also in touch with the best Universities and Lecturers in Europe, so we can also provide you talented recently Graduated Software Engineers or Students.

3.3 Cost

Depends on the developer (experience, efficiency, English level, IQ).

Senior Software Engineer	400-600€ per day
Software Engineer	250-400€ per day

Graduated Software Engineers (Level 7-10)	150-350€ per day
Student (Level 7-9)	125-300 € per day

+VAT if you are based in Ireland.
